Garment Care Instructions

DTF Printed Items

Thank you for your order! Every piece is custom printed by hand, just for you. A little care goes a long way toward keeping your print looking its best — here's how to make it last.

> **A faint box or outline around the design is completely normal.** Our printing process leaves a light "frame" or shading around the print — it is not a stain or a flaw. It fades and disappears within the first few washes.

HOW TO CARE FOR YOUR GARMENT

- **Wash before first wear.** Give your garment a wash before wearing it the first time.
- **Wash inside out** in **cold water**, with like colors only.
- **Use a mild detergent.** Avoid bleach and harsh or abrasive detergents.
- **Do not iron the print.** If needed, turn the garment inside out and press lightly on low — never directly on the design.
- **Air dry for best results,** or tumble dry on very low heat.

We hope you enjoy this garment as much as we enjoyed making it just for you! ♥
